

I don't understand how over-the-air radio broadcasters, whose influence already permits them to lease their frequencies from the American people _for free_, feel entitled _in a democracy_ to call upon the FCC to shut down XM's Instant Traffic & Weather service. This sounds more like a policy out of former Communist Russia than America and I urge the FCC to reject the NAB's petition 04-160, to not censor a well-regarded customer service of XM Radio just because the over-the-air services want to chop their fledgling satellite competition at the knees.
